Governing Board recognizes that technological resources can enhance employee performance by improving access to and exchange of information, offering effective tools to assist in providing a quality instructional program, and facilitating operations. The Board expects all employees to learn to use the available technological resources that will assist them in the performance of their job-responsibilities. As needed, employees shall receive training in the appropriate use of these resources.

If pass words are used, they must be known to the Superintendent or designee so that he/she may have system access.

The Superintendent or designee shall establish administrative regulations which outline employee obligations and responsibilities related to the use of technology. He/she also may establish guidelines and

limits on the use of technological resources. Inappropriate use shall result in a cancellation of the employee's user privileges, disciplinary action and/or legal action in accordance with law, Board policy and administrative regulations.
